Santa Barbara Integrated Regional Water Management Plan Final Review

Dear Mr. Stewart:

This letter transmits the Department of Water Resources (DWR) final review of the Santa Barbara Integrated Regional Water Management (IRWM) Plan. The public comment period on DWR's review of the Santa Barbara IRWM Plan has closed and no public comments were received. DWR has determined that Santa Barbara IRWM Plan is consistent with the IRWM Planning Act and the related IRWM Plan Standards contained in the 2012 IRWM Program Guidelines. The final review is posted on the following link: <http://www.water.ca.gov/irwm/grants/prp.cfm>.

If adopted by the Regional Water Management Group and project proponents, by the appropriate dates, the Santa Barbara IRWM Plan IRWM Plan will satisfy the terms of the Round 1 Implementation Grant Agreement's default clause and the adopted plan eligibility criteria for the 2014 Drought Solicitation. The grant agreement and grant solicitation have separate dates for adoption compliance.

To simplify submitting proof of adoption, DWR will compile and track this information and inform DWR grant managers and grant application review teams appropriately. You may submit proof of adoption material as often as necessary. When submitting information, please fill out and the IRWM Plan Adoption Form, found at: <http://www.water.ca.gov/irwm/grants/resourceslinks.cfm>, along with scanned proof of adoption, and then submit the material directly to Craig Cross at the email address listed below.

If you have any questions, please contact Craig Cross at (916) 651-9204 or Craig.Cross@water.ca.gov

Sincerely,

A handwritten signature in cursive script, reading 'Tracie L. Billington'.

INTRODUCTION

IRWM planning regions must have an IRWM Plan that has been reviewed and deemed consistent with the 2012 IRWM Plan Standards by DWR for eligibility to receiving Round 3 Proposition 84 funding. This 2012 IRWM Plan Standards Review Form for DWR staff use provides a consistent means in determining whether the 2012 IRWM Guidelines are being addressed in the IRWM Plan. It is part of the Plan Review Process that will begin prior to Round 3 solicitation. The form is similar to a grant application review form in that there is a checklist for each of the 16 Plan Standards and narrative evaluations where required. However, the evaluation is pass/fail; there is no numeric scoring. Each Plan Standard is either sufficient or not based on its associated requirements. Each Standard consists of between one and fourteen requirements. A Yes or No is automatically calculated in each Plan Standard header based on the individual requirement evaluations. In general, a passing score of "C" (i.e. 70% of the requirements for a given Plan Standard) is required for a Standard to pass. Standards with only one or 2 requirements will need one or both of those requirements to pass. Standards with 3 requirements will need at least 2 of the requirements to pass. Standards with 4 or 5 requirements will need at least 3 to pass. Some plan elements are legislated requirements. Such plan elements must be met in order to be considered consistent with plan standards. A summary of the sufficiency of each Standard is automatically calculated on the Standards Summary worksheet. A "No" evaluation indicates that a Standard was not met due to insufficient requirements comprising the Standard. The evaluation for each Plan Standard and any associated insufficiencies is automatically compiled on the Standards Summary page. Additional reviewer comments may be added at the bottom of each standards work sheet.

Note: This review form is meant to be a tool used in conjunction with the 2012 IRWM Guidelines document to assist in the evaluation of IRWM plans. It is not designed to be a substitute for the Guidelines document itself. Reviewers must use the Guidelines in determining plan consistency.

DEFINITION OF TABLE HEADINGS

IRWM Plan Standard: As named in the November 2012 IRWM Prop 84 and 1E Guidelines.

Overall Standard Sufficient: This field is either "YES" or "NO" and is automatically calculated based on the "Sufficient" column described below. If all fields are "y", the the overall standard is deemed sufficient. Any entry other than a "y" in the Sufficient column (i.e. "n", "?", not sure, more detail needed, etc.) results in a NO.

Plan Standard Requirements Which Must Be Addressed Fields with an asterisk * are required by legislation to be included in an IRWM Plan.

Requirement	Requirements are taken directly from the November 2012 Guidelines.
Included	Is the Guideline Requirement included in the IRWM Plan? The options are: y = yes, requirement is included in the IRWMP; or n = no, requirement is not included in the IRWMP. If only y or n then presence/absence of the requirement is sufficient for evaluation. If there is a "q" (qualitative) then add a brief narrative, similar to a Grant Application Review public evaluation or supporting information.
Plan Standard Source	
2012 IRWM Grant Program Guidelines Source Page(s)	Page(s) in the Guidelines (November 2012) which pertain to the Requirement.
Legislative Support and/or Other Citations	The CWC or other regulations that pertain to the Requirement, if applicable . This is for reference purposes. The cell links to a weblink of the regulatory code.
Evidence of Sufficiency	
Location of Standard in Grantee IRWM Plan	The page(s) or sections in the IRWM Plan where information on the Requirement can be found. This can be specific paragraphs or entire chapters for more general requirements.
Brief Qualitative Evaluation Narrative	Supporting information for the Requirement if a "q" is in the Included column. This can be just a few sentences or a paragraph and can be taken directly from the IRWM Plan. Comments or supporting information may be entered regardless of whether required.
Sufficient	Is the Guidelines requirement sufficiently represented in the IRWM Plan (y/n).

Additional Comments:

While deemed consistent with the 2012 Guidelines Plan Standards, DWR recommends that the following be addressed in future IRWM Plan updates:

Governance: It is implied but not stated in the Plan that past public outreach and involvement efforts are part of a process that will be utilized in the future. We recommend stronger linkage that these previous activities are part of an ongoing public outreach and involvement process pursuant to the Memoranda of Understanding. **Region Description:** Future water quality conditions are not addressed. **Resource Management Strategies:** There is no documentation that two Regional Management Strategies - Crop idling for water transfers and Irrigated land retirement - were considered during development of the plan. **Data Management:** Section 8.4.15 describes the data management system and data. However, it is not apparent that these data are in a format compatible with the State databases. **Climate Change:** No data gaps and information needs were identified for climate change.

The decision making process is described including guiding principles for effective decisionmaking.	y
Balanced access and opportunity for participation in the IRWM process	y/n/q	y	19/37		Sec. 2.2 & 2.3	The IRWM Region has conducted broad outreach to diversify stakeholder participation. Cooperating partners and stakeholders have the ability to attend IRWM meetings and make comments on the plan and sections as well as projects and the project selection process. All cooperating partner and workgroup meetings are open to the public providing any public stakeholder the opportunity to participate in the development/implementation of the plan.	y
Effective communication – both internal and external to the IRWM region	y/n/q	y	19/37-38		Sec. 2.9 & 2.5	Informal and formal communication processes are used. Informal communications consist of e-mail, conversations or phone calls and serve to supplement and enhance formal communications. Formal communications consist of notices of intent published county wide, public notices, and Cooperating Partners, Steering Committee and Work Group Meeting Notices. Inter-regional coordination occurs through inter-regional conference calls and meetings.	y
Long term implementation of the IRWM Plan	y/n/q	y	19/38		Sec 2.4 & 8.2	Formally, the MOU commits signatories to participate in, and make a financial and/or service oriented contribution toward, the ongoing process established pursuant to Prop 84. Also, creating a water-aware Region and demonstrating the value of IRWM planning and projects through education and outreach, the intent is for long-term support by all interested Cooperating Partners and the public. Section 8.2 states the plan will be implemented over a 25 year timeframe.	y
Coordination with neighboring IRWM efforts and State and federal agencies	y/n/q	y	19/38		Sec. 2.5	Inter-regional meetings and conference calls are held on an on-going basis with Kern County IRWM Region, San Luis Obispo County IRWM Region, and the Ventura County IRWM Region to discuss collaboration on potential projects in shared watersheds and groundwater basins, and how to share resources. Table 4.4 lists each objective and a set of measurable metrics (targets) to be used to provide a means to gage the Region’s progress toward meeting the regional objectives for a 25-year horizon. Many of these metrics are quantitative.	y
Explain how objectives are prioritized or reason why the objectives are not prioritized	y/n/q	y	20/42-43	--	Sec. 4.2.6	The Objectives Workgroup and Steering Committee choose not to prioritize the regional objectives or targets. The regional leadership believes that each objective is equally important relative to the others and that prioritizing objectives is not practical given the diversity of stakeholders involved in the process and Region, the range of priorities of various stakeholders, and the diversity of the regional needs. There was also concern that prioritized objectives could reduce interest and participation in the IRWM planning process and project selection process by discouraging development of projects that did not include a top objective.	y

The region utilized several processes to encourage the combining of information, expertise, knowledge, or personnel assistance to leverage resources of all regional stakeholders involved in the IRWM process. The governance structure that includes the Cooperating Partners and the Steering Committee brings together multiple cities, agencies, and organizations in regular meetings (6.2.2). The Steering Committee Subcommittee looked to gain economies-of-scale from utilizing and combining resources such as personnel, funding, and equipment from small projects in the same sub-region into a larger project for the sub-region (6.2.3).	y

There are several existing climate change studies underway for Santa Barbara County supported by some of the same member agencies of the RWMG that could easily be highlighted in the Plan to link data gaps with some of the prioritized vulnerabilities for SLR and ecosystem habitats (example includes the Santa Barbara Area Coastal Vulnerability Assessment involving the Cities of Santa Barbara, Carpinteria, Goleta, and County of Santa Barbara and the associated studies to support this assessment).	n
